

WALEED SHAFQAT

Senior Data Scientist | Analytics Consultant | BI & Machine Learning
Lahore, Pakistan (Remote) | waleedshafqat1@gmail.com | +61 451 466 432
[LinkedIn](#) | [Portfolio](#) | [Upwork \(Top Rated\)](#)

PROFESSIONAL SUMMARY

Senior Data Scientist and Analytics Consultant with 7+ years of experience delivering business intelligence dashboards, predictive models and end-to-end analytics solutions for enterprise clients including Levis, AstraZeneca, Toyota and Coles. Proven track record across retail, pharmaceutical, automotive finance and microfinance sectors spanning three continents. Top Rated on Upwork with 100% client satisfaction. Expert in Power BI, Tableau, Looker Studio, Python, SQL, BigQuery and machine learning. Microsoft Certified Azure Data Scientist Associate with an MSc in Data Analytics from RMIT University (Dean's List).

CORE SKILLS

BI & Visualization: Power BI, Tableau, Looker Studio, Excel, VBA, Dashboard Design

Programming: Python, R, SQL, JavaScript, TypeScript, PHP

Machine Learning: Scikit-learn, XGBoost, Time Series Forecasting (ARIMA, Prophet), k-means Clustering, Hierarchical Clustering, NLP, Feature Engineering, A/B Testing

Data Engineering: BigQuery, ETL Pipelines, SQL Server, Data Modeling, Data Warehousing

Cloud & Automation: Microsoft Azure, Power Platform (Power Apps, Power Automate), Power BI Service

Marketing Analytics: Google Analytics (GA4), Google Tag Manager, Funnel Analysis, Last-Touch Attribution, Segment

AI & LLMs: OpenAI, LangChain, RAG, AI Chatbots, Prompt Engineering

Web Development: Next.js, React, Tailwind CSS, HTML, CSS

Data Science Libraries: Pandas, NumPy, Matplotlib, Seaborn

Other Tools: Linux, Git, Jupyter, SAS

PROFESSIONAL EXPERIENCE

Senior Data Scientist | Lynx Analytics

Mar 2024 – Present

Singapore (Remote) — Promoted from Data Scientist

- Lead end-to-end analytics delivery for Levis and AstraZeneca, covering retail forecasting, customer value management (CVM) Analytics migration and healthcare business intelligence.
- Spearheaded Project Mercury — a 2-year enterprise-wide initiative migrating Levis analytical reporting from third-party tools to a fully owned in-house stack on BigQuery, Looker Studio and Segment, covering US, EU and Canada operations. Saved roughly half a million dollars annually by eliminating third-party tool licensing.
- Designed and deployed a hybrid bot-traffic scoring model in Python and BigQuery that protects KPI accuracy in business performance reporting by detecting sophisticated bots that evaded existing third-party filtering.
- Built unified Last-Touch Channel attribution reporting across web and app traffic for multiple regions, giving stakeholders clear channel-level performance visibility and improving marketing spend allocation.
- Engineered a Patient Model Submission and Forecasting Tracker for AstraZeneca, integrating Power Apps, Power Automate and Python so regional teams could submit patient models with automated consolidation and Power BI tracking.
- Mentor junior data scientists and analysts in dashboard development, SQL and machine-learning best practices.

Data Scientist | Lynx Analytics
Singapore (Remote)

May 2021 – Mar 2024

- Developed Python-based assortment optimization, revenue forecasting and pricing models for Levis China e-commerce operations, paired with executive dashboards driving merchandising decisions.
- Designed and maintained Power BI and Looker Studio dashboards for Levis China, US and Europe e-commerce reporting, including Funnel Metrics and Out-of-Stock Analysis reports.
- Built market comparison and performance tracking dashboards for AstraZeneca, plus a Patient Model Wizard application streamlining healthcare analytics workflows.
- Delivered customer segmentation, time-series forecasting and statistical modeling solutions across multiple enterprise engagements.

Freelance Data Scientist | Upwork (Self-Employed)
Remote — Top Rated · 100% Client Satisfaction

Nov 2019 – May 2021

- Achieved Top Rated freelancer status on Upwork with 100% job success score across diverse data science and BI engagements.
- Delivered Power BI risk reports for Toyota Australia and Toyota Ireland assessing auto loan portfolio performance and default risk.
- Built a credit scoring model for a microfinance bank using Scikit-learn and Pandas, reducing default risk for an underbanked customer portfolio.
- Developed Looker Studio dashboards and Google Analytics reports for EST Living, tracking user journeys and website performance across a portfolio of luxury real-estate brands.
- Designed and delivered hundreds of Power BI reports and SQL-driven dashboards on workplace injury data for Solv Australia (workplace safety platform) over a 1.5-year engagement.
- Designed and built a production website (HTML, CSS, JavaScript, PHP) for Positive Minds Gippsland, a mental-health counselling practice.

Advanced Analytics Intern | Coles Supermarkets
Melbourne, Australia

Aug 2019 – Nov 2019

- Built a customer segmentation model for the Coles baby category using k-means and hierarchical clustering, enabling targeted sales strategies across the product line.
- Developed real-time business-intelligence models from transactional data and authored SQL-based extraction pipelines for category insights.

Software Engineer | i2c Inc.
Lahore, Pakistan

Jul 2016 – Jul 2017

- Resolved software performance issues in production payment-processing systems using SQL and Linux.
- Performed root-cause analysis driving measurable system reliability and performance improvements.

SELECTED PROJECTS (NDA-RESPECTED)

Project Mercury — Reporting Migration at Levis

Levis via Lynx Analytics | Retail

Led a 2-year enterprise migration of all analytical reporting from third-party tools to an in-house stack across US, EU and Canada. Saved roughly half a million dollars annually. Stack: BigQuery, Looker Studio, Segment, ETL pipelines, SQL.

Bot Traffic Scoring Model

Levis via Lynx Analytics | Retail

Built a hybrid bot-detection model in Python and BigQuery to protect KPI accuracy, catching sophisticated bots that evaded existing third-party filtering.

Last-Touch Channel Attribution Reporting

Levis via Lynx Analytics | Retail

Built a unified attribution framework covering web and app traffic across multiple regions, giving stakeholders clear visibility into channel performance.

Patient Model Submission & Forecasting Tracker

AstraZeneca via Lynx Analytics | Pharmaceutical

End-to-end Power Platform solution enabling regional AstraZeneca teams to submit patient models with automated consolidation and Power BI forecasting.

Assortment Optimization for Global Apparel Retailer

Levis China via Lynx Analytics | Retail

Python-based assortment optimization and revenue forecasting models with executive dashboards for global retailer's China operations.

Customer Segmentation — Coles Baby Category

Coles | Retail

Customer segmentation model using k-means and hierarchical clustering for all baby-product purchasers, enabling targeted sales strategies.

Workplace Injury Reporting Suite

Solv Australia via Upwork | Workplace Safety

Designed and delivered hundreds of Power BI reports and SQL dashboards covering workplace injury data over an 18-month engagement.

Credit Scoring Model

Microfinance Bank (Direct Engagement) | Finance

Built a robust credit-scoring model in Python and Scikit-learn reducing default risk for a microfinance lender serving underbanked populations.

EDUCATION

Master of Science in Data Analytics

2017 - 2019

RMIT University, Melbourne, Australia

- Dean's List — Semester 2, 2017

Bachelor of Science in Computer Science

2012 - 2016

National University of Computer & Emerging Sciences (FAST), Lahore, Pakistan

CERTIFICATIONS

- Microsoft Certified: Azure Data Scientist Associate — Microsoft
- SAS Advanced Analytics Certification — SAS Institute

PUBLICATIONS

- Performance Comparison of Feature Selection and Extraction Methods with Random Instance Selection — Research Publication, 2019

INDUSTRIES SERVED

Retail • Pharmaceutical • Automotive Finance • Microfinance • Healthcare • Real Estate • Workplace Safety • Business Services
